RESOURCES

Responsive Navigation

https://www.w3schools.com/howto/howto_js_topnav_responsive.asp

This resource was used as a guide to create a responsive navigation bar that changed from a full-width navigation bar to a hamburger menu on small screens. Unlike the example given, min-width media queries were used in the assignment in order to keep a mobile-first approach.

Validator

<https://jigsaw.w3.org/css-validator/validator>

Jigsaw was used as an HTML and CSS validator to ensure a correct code.

JS Plugin - Fade In on Page Load

<https://www.jqueryscript.net/blog/best-page-transition.html>

<https://www.jqueryscript.net/animation/Creating-A-Simple-Fade-In-Effect-On-Page-Load-with-jQuery.html>

This page contained several ideas on the best Javascript transition plugins. This led me to find a fade-in on page load that I implemented on all my pages.

RESOURCES

Flexbox Guide

<https://css-tricks.com/snippets/css/a-guide-to-flexbox/>

This resource was used as a guide when making all my pages responsive. I used flexbox to create a mobile-first responsive design and referenced all of the CSS properties available for Flexbox, which are all listed and defined on this website.

Stack Overflow

<https://stackoverflow.com/questions/28554349/bootstrap-3-navbar-links-not-working>

I used Stack Overflow for troubleshooting. I ran into issues with my navigation bar links. They stopped working and Stack Overflow helped me realize that the issue was rooted in errors caused by one of my JavaScript plugins.
